## Senior Software Engineer

Remote | [zclarkmail@gmail.com](mailto:zclarkmail@gmail.com) | [zclabs.io](https://zclabs.io) | [linkedin.com/in/zrclark/](https://linkedin.com/in/zrclark/)

Driven and collaborative senior software engineer with a proven track record of over seven years, focusing on frontend development and expertise in the JavaScript ecosystem.

## RELEVANT EXPERIENCE

### Senior Software Engineer - Bryx, Inc. - Rochester, NY & Remote

OCT 2022 - PRESENT

- Functioned as the frontend subject matter expert and development lead for a records management system, guiding its journey from ideation to beta launch.
- Partnered closely with a designers to craft an atomic design system and an accessible React component library, fostering collaboration and ensuring the system's usability.

### Senior Software Engineer - Datto, Inc. - Rochester, NY & Remote

AUG 2021 - OCT 2022

- Managed and upheld an administrative portal utilized by the entire partner support organization.
- Engineered and implemented a service API to furnish the partner-facing portal with diverse documents, employing technologies such as AWS S3 and Symfony 5.4.

### Software Engineer - Datto, Inc. - Rochester, NY & Remote

MAR 2020 - AUG 2021

- Played a key role in the transformation of a legacy jQuery storefront application into React, significantly enhancing its performance and scalability. The storefront facilitated approximately \$2M in monthly revenue.
- As one of the founding developers and initial maintainers, I contributed to the creation of an accessible React component library. This library effectively implemented an internal design system, ensuring consistency and usability across projects.

### Software Engineer - EagleDream Technologies - Rochester, NY

JAN 2018 - FEB 2020

- Developed a cloud-native web portal from scratch for a startup, featuring a 3D modeling tool, leveraging Angular 6, DynamoDB, and AWS Lambda (Node.js).
- Played a pivotal role in overhauling the primary website for a prominent automotive client with a market capitalization of \$1.5B, involving the transition from a DNN platform to WordPress, and subsequently implementing custom PHP and JavaScript functionalities.
- Spearheaded the development of a WordPress website for a national auto services client, utilizing PHP, JavaScript/jQuery, and contributing to the creation of a bespoke admin interface built with Angular.
